<u>User Manual</u>

The following user manual will simply help the user to understand each option that displays on the screen after running the application.

Option 1.

This option will allow the user to input income in the database. The user will be able to input date and category as he likes. But please ensure the correct format (dd/mm/yyyy) while inputting date.

Option 2.
This option is for allowing the user to input expense on a particular day, also allows the user to add category.

Option 3.

By selection this option you can easily view all your incomes altogether, also you can have a look at from which category you're earning the most.

Option 4.

By selecting this option, you can have a look at all your expenses which you had input earlier in the database.

Option 5.

If you select this option, the program will ask you to input a date (Please follow the format(dd/mm/yyyy) and then it will show you your income on that particular day.

Option 6.

This will ask you for a date and will show you your expenditure on that particular date.

Option 7.

This option is for shutting down the application.

Invalid Option:

If you choose anything other than 1-7 in the main screen of the program, then the program will simply show you that your choice has been invalid.

/*THANK YOU*/
